Declaration

26/04/2010

I am Yotam Givati herewith confirm and verify the following:

During my work duty acting as a General Manager of various dairy herds around Israel (2005-2010) I was successfully used the product Shipurit for dairy cows. The product Shipurit had shows, clearly, positive and significant effects on the improvement of the cow's efficiency (Milk/Feed) by 8%.

In addition, I can confirm that the product Shipurit enhanced the performance of the cows by better milk production (2.5kg/day per cow), better economic corrected milk (ECM), better physical growth and better general feed utilization and economic efficiency.

Also, for my best knowledge, the product Shipurit improved milk quality (additional milk solids as fat and protein). The product Shipurit had positive effects on the status of the digestive system (less cases of diarrhea) and reduced urea in blood and milk. The mix of the product Shipurit into the cow's rations was very easily to use and friendly and obviously made a better TMR (total mix rations) for the cow's diets.

With best wishes,

Yotam Givati

General Dairy herds Manager
